

Shark Tank India Dashboard Report

Project Title

Shark Tank India Dashboard using Tableau

1. Objective

The objective of this project is to analyze the Shark Tank India dataset using Tableau and create an interactive dashboard that provides insights into investments, deal amounts, shark participation, and company valuations.

2. Tools Used

- Tableau Public/Desktop
 - Microsoft Excel (CSV Dataset)
-

3. Dataset

Dataset Name: Shark Tank India Dataset

The dataset contains information about:

- Brand Name
 - Episode Number
 - Pitch Number
 - Deal Status
 - Ask Valuation
 - Deal Amount
 - Amount Per Shark
 - Shark-wise investments
-

4. Dashboard Components

The dashboard contains the following visualizations:

Top Deals by Brand

Displays brands that received the highest investment amounts.

Deals by Shark

Shows the total number of deals made by each shark.

Deal Status

Displays whether startups received an investment or not.

Top 10 Highest Amount Per Shark

Shows brands that received the highest investment per shark.

Valuation vs Deal

A scatter plot comparing company valuation with the final investment amount.

5. Key Insights

- Some brands received significantly higher investments than others.
 - Certain sharks participated in more deals compared to others.
 - Higher company valuation does not always result in a larger investment.
 - The dashboard provides a quick overview of investment trends in Shark Tank India.
-

6. Conclusion

This Tableau dashboard helps visualize investment patterns and business insights from the Shark Tank India dataset. It enables users to analyze deal amounts, shark participation, and company valuations efficiently through interactive visualizations.

7. Outcome

Successfully created an interactive Tableau dashboard using the Shark Tank India dataset and generated meaningful business insights.
